COURT-MÉTRAGE D’HORREUR

V4 — STORYBOARD CANON RÉCONCILIÉ

Dossier de production · feuille de montage 180 secondes · prompts Arcads

Source de vérité : storyboard original réconcilié par Marty. Cette version remplace le découpage provisoire du premier PDF. Elle conserve les 41 vignettes du storyboard et les 10 inserts E01–E10, soit 51 éléments de montage et 180 secondes exactement.

Verrou technique : DV Camcorder + optique anamorphique + ratio 2.39:1. Patine DV subtile : bruit numérique léger et chroma discret, pas de filtre VHS ni de grain 35 mm.

Point non arbitré : la passagère N est brune en tenue sombre sur la vignette 36, mais blonde en pull clair dans le character sheet Notion. Le dossier ne tranche pas et interdit de mélanger les références.

1. Canon narratif — corrections non négociables

• C et M sont deux personnages différents. C est la créature encapuchonnée aux yeux rouges, robe claire usée ; elle apparaît aux plans 14, 16, 17, 24, 26, 32b et 38. M est le jeune homme noir aux cheveux courts et tee-shirt gris, uniquement dans le flashback 29a, 29b et 30.
• Reflet : C apparaît derrière H dans le miroir au plan 24 seulement, puis hors miroir au choc 32b. La main autonome au plan 31 appartient au reflet de H, pas à C.
• Décors : métro actuel bleu, humide, brumeux, rame blanche/teal ; station fantôme de même langage architectural mais vieillie ; corridor et chambre chauds, poussiéreux, contaminés par du bleu.
• Inserts : E01–E10 sont des éléments narratifs, ils ne remplacent aucune vignette.

2. Personnages et assets à importer

H : héroïne noire, cheveux bouclés volumineux, manteau camel, sac sombre. Réutiliser son character sheet sur tous ses plans et son reflet.
C : créature en robe/capuche claire usée, yeux rouges, visage altéré. Ne jamais utiliser la référence de M pour elle.
M : jeune homme noir, cheveux courts, tee-shirt gris. Flashback uniquement ; aucun œil rouge, aucune capuche.
N : nouvelle passagère, blonde ou brune selon arbitrage. Créer un identifiant unique seulement après décision.
TRAIN : rame blanche/teal, quai voûté, brume bleue et reflets humides. Verrouiller l'image maîtresse.
ENV : LOC-01 à LOC-05 et plates approuvées. VFX : clean plate + passes personnages/reflets pour les plans 23, 24, 27, 28, 29b, 30, 31, 33 et 37.

3. Feuille de montage canonique — 180 secondes

TC = timecode ; les durées sont celles proposées par Marty et seront validées au premier animatic.

Shot 32b, story 32b, 02:35–02:38, 3 seconds. Brève révélation de la créature derrière elle, hors miroir. Framing: Rapproché; compose for 2.39:1 anamorphic widescreen. Camera: early-2000s DV camcorder, controlled movement, stable geometry. Lighting and palette: Cold cobalt/teal blue, worn ivory cloth, tiny restrained ruby-red eye highlights. Motivated practical sources, realistic exposure and readable blacks. Continuity: Use only the approved references for all listed assets; generate clean plate and VFX passes separately where needed. Preserve approved set geometry, props, wardrobe and screen direction. Photorealistic live-action psychological horror, realistic skin and materials, subtle MiniDV sensor noise and mild chroma noise, subtle horizontal anamorphic streaks, gentle halation, physically believable motion. Negative: no VHS filter, no videogame/CGI look, no plastic skin, no warped anatomy, no extra fingers, no duplicated faces, no random text, no subtitles, no logos, no unmotivated camera movement.

6. Raccords et motifs visuels

Reflet : E03 flaque → E05 vitre trompeuse → E10 empreinte derrière le verre → Story 23 reflet autonome → Story 31 main du double → Story 37 reflet prisonnier.
Trois impulsions : E02 trois clignotements → déplacement hors champ de C → craquements Story 27/33 → trois impulsions sur noir final.
Seuils : entrée métro → portes de rame → porte de bois → porte disparue → vitre-prison.
Couleur : Paris bleu nuit + ambre ; quai bleu froid ; rame bleu froid ; station fantôme désaturée ; intérieur ambre sale contaminé de bleu ; retour bleu métro.
Caméra lock : plans 14/16/17 : même axe, focale, géométrie et pose de C ; seul son emplacement change entre les cuts.

7. Plan de production par lots

1. PLATES : approuver les images maîtresses du train extérieur, quai, intérieur rame, station fantôme, couloir et chambre.
2. INSERTS : produire E01–E10 à partir des plates et du camera lock ; les garder dans le montage.
3. ACTES 1–2 : générer H et C séparément ; verrouiller les axes 14/16/17 ; révéler C par jump-cuts, pas par déplacement animé.
4. ACTE 3 : clean plate du miroir, pass H, pass C ou reflet décalé ; compositing pour les plans 23, 24, 27, 28, 29b, 30, 31, 33 et 37.
5. FIN : arbitrer N avant génération des plans 36/38 ; reproduire le même train et l'étalonnage bleu.
6. MONTAGE : animatic muet sur les timecodes, puis son, contrôle de 03:00 exact.

8. Points à valider avant verrouillage

Décision obligatoire — N : la vignette storyboard 36 montre une passagère brune en tenue sombre ; le character sheet Notion montre une blonde en pull clair. Choisir une seule référence avant de créer l'asset N. Le dossier ne tranche pas.
Lien M/C : la V4 ne définit pas complètement le lien entre le jeune homme du flashback et la créature. Ne pas inventer l'explication dans les prompts.
Musique : conserver le départ sur le refrain dans les écouteurs ; vérifier les droits de synchronisation et d'enregistrement pour toute diffusion publique de The Reason. Marty gère la conception sonore.

9. Contrôle qualité

☐ 180 secondes exactes et aucun plan ajouté.
☐ 2.39:1, DV Camcorder et anamorphique constants.
☐ H, C, M et N jamais confondus.
☐ C encapuchonnée aux yeux rouges uniquement dans les plans indiqués.
☐ M uniquement en tee-shirt gris dans le flashback.
☐ C dans le miroir au 24 ; hors miroir au 32b ; main autonome de H au 31.
☐ Même géométrie de rame et axe en 14/16/17.
☐ Inserts E01–E10 présents.
☐ Reflets, mains, portes et textes vérifiés plan par plan.
☐ Identité N arbitrée avant les plans 36 et 38.
